

News Studio Highlights

- **Watch WSYR9, WTVH5** local news live at 12 noon – recorded automatically –
- Local news recordings should be available in your NHCLOUD folder for this course
- **CNN Newsource** (website) **newsource.cnn.com** user: **SCU**, password: **mint**
 - Download **HD 1080i NTSC** format
- **Xpression Graphics:** to add to story, rt-click MOS icon in ENPS taskbar, and select xPression.
 - Make sure NCC News is selected as the **SHOW (or MOTH, etc.)**
 - **All Images and videos used in graphics MUST reside in CLASS FILES>GRAPHICS** (videos can stay there, in the VIDEOS subfolder.) Do NOT rename or move the image/videos once the graphic has been created!
- **Make sure you enter text and choose images in the CENTER area of the xPressions plugin**
- **NXMB Video Server:** rt-click MOS icon in ENPS to select it ... click **ALL MEDIA** tab ... right-click **REFRESH** in gray area to see list of all videos in the server. Drag filename of edited video into top of story page to add to story,
- **NCC News** Online as filetype?
- **Premiere:** edit using the BDJ Class Preset CC 2020 generic project (in CLASS FILES>UNIVERSAL TEMPLATES>BDJ Sample Project; download/import the BDJ NEWSROOM EXPORT PRESET SERVER (MXF) and Newscast OTS Video 2018 AVI (AVI) export presets from CLASS FILES>UNIVERSAL TEMPLATES; **VO: audio at -30db** in the AUDIO METER. Filename should be **6 digit date plus rundown slug and segment plus 4p or 445p**. Max characters 32 in filename = **012815 City Hall Budget SOTVO4p** **Do not use any characters but letters and numbers in a filename! No weird characters like punctuation, !@.#\$%&, etc.**
- **FTP video to server:** check file first using **Media Info** (Media Info FOLDER must be copied from CLASS FILES>APPLICATIONS to a folder on your Desktop called **APPS-SU**, then run Media Info from the APPS-SU folder, NOT in CLASS FILES!) Drag your MXF file into the MediaInfo window.
 - Make sure your video shares the following settings:
 - CONTAINER AND GENERAL INFO: **MXF (OP-1a) (XDCAM HD422)**
 - 1 VIDEO STREAM: **MPEG Video**
 - 2 AUDIO STREAMS: **PCM/PCM**
- Use **FILEZILLA** to send video to server: (remote students, download for free, do a Google search)
 - Open the ftp program FILEZILLA (type FILEZILLA into the Windows search box); suggest you drag it to your taskbar to create a permanent shortcut
 - Click the whiteish icon under FILE to Open the Site Manager
 - Click on NEW SITE, and enter the data from the following screenshot:

- Find the file you want to upload in the folder where you saved it on your external drive by drilling through the folders **on the left (LOCAL SITE)**
- When you find it, just drag and drop it across onto the right pane of the server into the correct root folder, just under REMOTE SITE

- ISIS login
- Dejero/LiveU
- Touchscreen
